The Union Pacific serves six States and four Territo-ries. There is not one of these States and erritories which is not to-day esiling for railread development, which, if it could be provided, would not only afford whole communities valuable business facilities, but would add largely to the traffic and in-come of this company. Every dollar of money, therefore, which is taken out of our business annually is so much which could be applied to the development of

There is one other matter to which I wish to refer, and upon which much stress has been laid in the discussions over the different measures proposed. It is a matter of some delicacy, but it seems to me important, and in such cases I do not see that anything is gained by not speaking out frankly, or, if need be, blundly. I have seen it stated, not only in the papers, but in debates in Congress, that practically the Union Pacific was still managed by Mr. Gould, and that I had simply been put forward by him as a figurehead in order to allay popular feeling and obtain terms more favorable than could otherwise be given. In justice to Mr. Gould as well as myself, I wish to state that this is in no degree the case. I was not Mr. Gould's choice for the position I now hold. Moreover, since the 17th of June last, when I became president of the Union Pacific Railroad Company, I wish to be held solely responsible for whatever has been done in the management of that company. In the conduct of its affairs Mr. Gould has been consulted—
